Christian science so-called;: An exposition and an estimate, Henry C Sheldon
Christian Science is much more than a peculiar type of medical theory and practice. It presents itself in the character of a distinct religion no less than does Mormonism, which it strongly resembles both in the scope of the prophetical function assigned to the founder and in the employment of a concentrated money power in the interest of propagandism. It is in this character of a distinct religion that Christian Science is examined and judged in the present essay, though, of course, its boasted healing art is so much of a factor in the religion that it must be accorded some attention. We offer no apology for borrowing certain statements of fact from the book of Georgine Milmine on the Life of Mary Baker G. Eddy.
