Statistical Matching: Theory and Practice Marcello D'Orazio, Marco Di Zio, Mauro Scanu
There is more statistical data produced in today's modern society than ever before. This data is analysed and cross-referenced for innumerable reasons. However, many data sets have no shared element and are harder to combine and therefore obtain any meaningful inference from. Statistical matching allows just that; it is the art of combining information from different sources (particularly sample surveys) that contain no common unit. In response to modern influxes of data, it is an area of rapidly growing interest and complexity. *Statistical Matching: Theory and Practice* introduces the basics of statistical matching, before going on to offer a detailed, up-to-date overview of the methods used and an examination of their practical applications.

- Presents a unified framework for both theoretical and practical aspects of statistical matching.
- Provides a detailed description covering all the steps needed to perform statistical matching.
- Contains a critical overview of the available statistical matching methods.
- Discusses all the major issues in detail, such as the Conditional Independence Assumption and the assessment of uncertainty.
- Includes numerous examples and applications, enabling the reader to apply the methods in their own work.
- Features an appendix detailing algorithms written in the R language.

Statistical Matching: Theory and Practice presents a comprehensive exploration of an increasingly important area. Ideal for researchers in national statistics institutes and applied statisticians, it will also prove to be an invaluable text for scientists and researchers from all disciplines engaged in the multivariate analysis of data collected from different sources.

From reader reviews:

Yolanda Osuna:

Book is actually written, printed, or illustrated for everything. You can recognize everything you want by a book. Book has a different type. As you may know that book is important matter to bring us around the world. Next to that you can your reading expertise was fluently. A guide Statistical Matching: Theory and Practice will make you to possibly be smarter. You can feel a lot more confidence if you can know about almost everything. But some of you think that will open or reading a new book make you bored. It's not make you fun. Why they might be thought like that? Have you in search of best book or suitable book with you?

Jeffrey Richard:

What do you think about book? It is just for students since they're still students or this for all people in the world, exactly what the best subject for that? Simply you can be answered for that problem above. Every person has different personality and hobby per other. Don't to be obligated someone or something that they don't wish do that. You must know how great along with important the book Statistical Matching: Theory and Practice. All type of book could you see on many solutions. You can look for the internet solutions or other social media.

Jeremy Richards:

What is your hobby? Have you heard in which question when you got scholars? We believe that that problem was given by teacher to the students. Many kinds of hobby, Every person has different hobby. And you also know that little person such as reading or as reading become their hobby. You must know that reading is very important in addition to book as to be the thing. Book is important thing to increase you knowledge, except your own teacher or lecturer. You find good news or update with regards to something by book. Amount types of books that can you decide to try be your object. One of them is this Statistical Matching: Theory and Practice.

Elaine Sitz:

Reading a book make you to get more knowledge from that. You can take knowledge and information from your book. Book is created or printed or outlined from each source which filled update of news. Within this modern era like today, many ways to get information are available for you. From media social similar to newspaper, magazines, science guide, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Do you want to spend your spare time to spread out your book? Or just in search of the Statistical Matching: Theory and Practice when you necessary it?
