Relevant Business Statistics Using Excel with Data Disk: Package David Gerbing
Not only classroom tested, this book has truly been classroom driven. David Gerbing has been teaching this material in his own classes for over 3 years and revising it to better address difficult topics and areas of student confusion. This Excel driven text combines the presentation of content, the illustration of concepts, and multiple opportunities for application throughout the body of each chapter; the author does not wait until the end of the chapter to provide exercises which reinforce the material. He relies heavily on visual examples (line graphs, tables, histograms, screen dumps from Excel, ect.) to explain and support the theoretical material being discussed. The integration of content and exercises allows for more regular practice of statistical principles, ensuring a higher level of student mastery.
