B R E O Ellipta: Treats Airflow Obstruction in Chronic Obstructive Pulmonary Disease or COPD (including Chronic Bronchitis & Emphysema) and Asthma in Patients 18 Years and Older James Lee Anderson
“Although, your health condition may impact your everyday life, do not let it define who you are.” BREO ELLIPTA (fluticasone and vilanterol combination) is used to control wheezing, shortness of breath, coughing, and chest tightness caused by chronic obstructive pulmonary (COPD; a group of diseases that affect the lungs and airways, that includes chronic bronchitis and emphysema). Fluticasone is in a class of medications called steroids. It works by reducing swelling in the airways. Vilanterol is in a class of medications called long-acting beta-agonists (LABAs). It works by relaxing and opening air passages in the lungs, making it easier to breathe. This medicine is available only with your doctor's prescription. Thanks and may you have a good understanding about this drug—BREO ELLIPTA. You may want to share this book with your family and friends who may be in need of help and would want to use this medicine. Take care, and as always, be well!
