Geometric Exercises in Paper Folding (Classic Reprint) Tandalam Sundara Rao
The idea of tMs book was suggested to me by Kiudergarten Gift No. VIII. Paper-folding. The gift consists of 200 varioily coloured squares of paper, a folder, and diagrams and instructions for folding. The paper is coloured and glazed on one side. The paper may, however, be of self-colour, alike on both sides. In fact, any paper of moderate thickness will answer the purpose, but coloured paper shows the creases better, and is more attractive. The kindergarten gift is sold by Messrs. Higginbotham and Co,; but coloured paper of both sorts can be had in the bazaars. A packet of 100 squares of both sorts accompanies this book, and the packets can also be had separately. A ny sheet of paper can be cut into a square as explained in the opening articles of this book, but it is neat and convenient to huve the squares ready cut. 2. These exercises do not require mathematical instruments, the only things necessary being a penknife and scraps of paper, the latter being used for setting off equal lengths. The squares are themselves simple substitutes for a straight edge and aT square. 3. In paper-folding several important geometrical processes can be effected much more easily than with a pair of compasses and ruler, the only instruments the use of which is sanctioned in Euclidian Geometry ;for example, to divide straight lines and angles into two or more equal parts, to draw perpendiculars and parallels to straight lines. It is, however, not possible in paper-folding to describe a circle, but a number of points on a circle, as well as other curves, may be obtained by other methods. (Typographical errors above are due to OCR software and don't occur in the book.)

About the Publisher

Forgotten Books is a publisher of historical writings, such as: Philosophy, Classics, Science, Religion, History, Folklore and Mythology.

Forgotten Books' Classic Reprint Series utilizes the latest technology to rege
