Nursing Research Using Case Studies: Qualitative Designs and Methods in Nursing Mary De Chesnay PhD RN PMHCNS-BC FAAN

Once considered to be a lesser pedagogical method, the case study is indeed a powerful, in-depth tool with which to examine evidence-based practice around patient care, family dynamics, professional roles, and organizational systems. Here is a unique “how-to” guide to conducting research using case studies. Focusing on leading and newer methodologies, the text describes the philosophical basis and state of the art for using this qualitative method. The peer-reviewed designs (including interviews, physiological measurements, psychological tests, and analysis of patients’ diaries and journals) are accompanied by an in-depth research plan, a discussion of appropriate methods, and ethical considerations. The text provides clear directives—bolstered by nursing examples--on how to solve practical problems a researcher may encounter.

Examples from international scholars who have published research using case studies are included along with coaching designed to support the new researcher in making decisions and facing challenges. Also included are book and chapter objectives, competencies, review questions, critical thinking exercises, and web links to additional information. The text is part of a series of eight concise volumes addressing a variety of methods for conducting qualitative research. Conceived and edited by a noted expert in qualitative research, the book is designed for both novice and practicing researchers seeking to develop or expand their competency, health institution research divisions, in-service educators and students, and graduate nursing educators and students.

Key Features:

- Explains clearly and concisely how to conduct research using case studies
- Reviews the philosophical basis for using case studies
- Focuses on solving practical problems related to conducting research
- Offers rich nursing exemplars and coaching from international health/mental health contributors
- Includes objectives, critical thinking exercises, competencies, resources, and review material for each book.
