By focusing on the various facets of the caregiving experience, the authors sensitize professionals to the ways in which caregiving is affected by the conditions, personalities, capabilities, and wishes of both the caregivers and the care recipients. Chapters explore the range of care receivers, from frail elderly to young children, and the difference in caregiving styles and options. Also addressed are issues related to resistance to care, claims of self-determination, and when intervention is necessary. Chock-full of descriptive case examples, this clearly written text is must reading for social workers, nurses, and also gerontologists.
