The 2-tuple Linguistic Model: Computing with Words in Decision Making Luis Martínez, Rosa M. Rodriguez, Francisco Herrera

This book examines one of the more common and wide-spread methodologies to deal with uncertainty in real-world decision making problems, the computing with words paradigm, and the fuzzy linguistic approach. The 2-tuple linguistic model is the most popular methodology for computing with words (CWW), because it improves the accuracy of the linguistic computations and keeps the interpretability of the results.

The authors provide a thorough review of the specialized literature in CWW and highlight the rapid growth and applicability of the 2-tuple linguistic model. They explore the foundations and methodologies for CWW in complex frameworks and extensions. The book introduces the software FLINTSTONES that provides tools for solving linguistic decision problems based on the 2-tuple linguistic model.

Professionals and researchers working in the field of classification or fuzzy sets and systems will find *The 2-tuple Linguistic Model: Computing with Words in Decision Making* a valuable resource. Undergraduate and postdoctoral students studying computer science and statistics will also find this book a useful study guide.

From reader reviews:

Diana Pearson:

This The 2-tuple Linguistic Model: Computing with Words in Decision Making book is not really ordinary book, you have it then the world is in your hands. The benefit you get by reading this book will be information inside this e-book incredible fresh, you will get details which is getting deeper an individual read a lot of information you will get. That The 2-tuple Linguistic Model: Computing with Words in Decision Making without we comprehend teach the one who reading it become critical in contemplating and analyzing. Don't always be worry The 2-tuple Linguistic Model: Computing with Words in Decision Making can bring when you are and not make your tote space or bookshelves' become full because you can have it within your lovely laptop even cell phone. This The 2-tuple Linguistic Model: Computing with Words in Decision Making having excellent arrangement in word and also layout, so you will not feel uninterested in reading.

Anita Cannon:

The knowledge that you get from The 2-tuple Linguistic Model: Computing with Words in Decision Making could be the more deep you searching the information that hide within the words the more you get interested in reading it. It doesn't mean that this book is hard to comprehend but The 2-tuple Linguistic Model: Computing with Words in Decision Making giving you buzz feeling of reading. The article author conveys their point in selected way that can be understood by means of anyone who read that because the author of this guide is well-known enough. This particular book also makes your own vocabulary increase well. It is therefore easy to understand then can go with you, both in printed or e-book style are available. We highly recommend you for having this kind of The 2-tuple Linguistic Model: Computing with Words in Decision Making instantly.

Grant Rickard:

Reading can called thoughts hangout, why? Because if you find yourself reading a book particularly book entitled The 2-tuple Linguistic Model: Computing with Words in Decision Making your head will drift away trough every dimension, wandering in every aspect that maybe unfamiliar for but surely will end up your mind friends. Imaging every word written in a guide then become one web form conclusion and explanation that will maybe you never get just before. The The 2-tuple Linguistic Model: Computing with Words in Decision Making giving you an additional experience more than blown away the mind but also giving you useful information for your better life within this era. So now let us present to you the relaxing pattern at this point is your body and mind will likely be pleased when you are finished looking at it, like winning a game. Do you want to try this extraordinary investing spare time activity?

Arthur Faust:

Reading a guide make you to get more knowledge from that. You can take knowledge and information

coming from a book. Book is created or printed or descriptive from each source this filled update of news. On this modern era like today, many ways to get information are available for you actually. From media social similar to newspaper, magazines, science publication, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to spread out your book? Or just seeking the The 2-tuple Linguistic Model: Computing with Words in Decision Making when you required it?
