Topics in Biomathematics J C Misra
This book focuses on the integration of mathematical models dealing with the dynamics of the cardiovascular system. The author uses a step-by-step approach to describe different components of the cardiovascular system and provides a variety of information about the dynamical behavior of the cardiovascular system with appropriate diagrams. Various mathematical models for modeling the vascular dynamics of wall tissues, the circulatory system and the flow dynamics of blood in normal as well as pathological states are presented in a systematic manner. This unique work explains technical aspects of the techniques in simple language that is appropriate for novice researchers and scientists. The book bears the potential to suggest further lines of both experimental and theoretical studies.
