# Case Studies in Environmental Archaeology (Interdisciplinary Contributions to Archaeology)

**Case Studies in Environmental Archaeology (Interdisciplinary Contributions to Archaeology)**

This book highlights studies addressing significant anthropological issues in the Americas from the perspective of environmental archaeology. The book uses case studies to resolve questions related to human behavior in the past rather than to demonstrate the application of methods. Each chapter is an original or revised work by an internationally-recognized scientist. This second edition is based on the 1996 book of the same title. The editors have invited back a number of contributors from the first edition to revise and update their chapter. New studies are included in order to cover recent developments in the field or additional pertinent topics.
