Micro-Doppler Characteristics of Radar Targets

Qun Zhang, Ying Luo, Yong-an Chen

Micro-Doppler Characteristics of Radar Targets Qun Zhang, Ying Luo, Yong-an Chen

Micro-Doppler Characteristics of Radar Targets is a monograph on radar target's micro-Doppler effect theory and micro-Doppler feature extraction techniques. The micro-Doppler effect is presented from two aspects, including micro-Doppler effect analysis and micro-Doppler feature extraction, with micro-Doppler effects induced by different micro-motional targets in different radar systems analyzed and several methods of micro-Doppler feature extraction and three-dimensional micro-motion feature reconstruction presented.

The main contents of this book include micro-Doppler effect in narrowband radar, micro-Doppler effect in wideband radar, micro-Doppler effect in bistatic radar, micro-Doppler feature analysis and extraction, and three-dimensional micro-motion feature reconstruction, etc.

This book can be used as a reference for scientific and technical personnel engaged in radar signal processing and automatic target recognition, etc. It is especially suitable for beginners who are interested in research on micro-Doppler effect in radar.

- Presents new views on micro-Doppler effects, analyzing and discussing micro-Doppler effect in wideband radar rather than focusing on narrowband
- Provides several new methods for micro-Doppler feature extraction which are very helpful and practical for readers
- Includes practical cases that align with main MATLAB codes in each chapter, with detailed program annotations

From reader reviews:

Josephine McIntire:

As people who live in often the modest era should be revise about what going on or details even knowledge to make these people keep up with the era which is always change and move ahead. Some of you maybe will update themselves by looking at books. It is a good choice for yourself but the problems coming to anyone is you don't know what type you should start with. This Micro-Doppler Characteristics of Radar Targets is our recommendation so you keep up with the world. Why, because book serves what you want and want in this era.

Arturo Lamb:

Nowadays reading books become more than want or need but also get a life style. This reading practice give you lot of advantages. The advantages you got of course the knowledge the particular information inside the book this improve your knowledge and information. The information you get based on what kind of reserve you read, if you want have more knowledge just go with knowledge books but if you want truly feel happy read one having theme for entertaining for example comic or novel. The Micro-Doppler Characteristics of Radar Targets is kind of reserve which is giving the reader capricious experience.

Everett Barton:

This book untitled Micro-Doppler Characteristics of Radar Targets to be one of several books in which best seller in this year, that is because when you read this book you can get a lot of benefit into it. You will easily to buy this kind of book in the book store or you can order it via online. The publisher on this book sells the e-book too. It makes you more easily to read this book, since you can read this book in your Mobile phone. So there is no reason to your account to past this reserve from your list.

Christopher Arnold:

Your reading 6th sense will not betray you actually, why because this Micro-Doppler Characteristics of Radar Targets guide written by well-known writer who really knows well how to make book that can be understand by anyone who else read the book. Written with good manner for you, dripping every ideas and composing skill only for eliminate your personal hunger then you still hesitation Micro-Doppler Characteristics of Radar Targets as good book not merely by the cover but also by the content. This is one book that can break don't judge book by its cover, so do you still needing another sixth sense to pick this kind of!? Oh come on your reading sixth sense already alerted you so why you have to listening to one more sixth sense.
