Islamic Architecture in Iran: Poststructural Theory and the Architectural History of Iranian Mosques (International Library of Iranian Studies) Saeid Khaghani
The architecture of the Islamic world is predominantly considered in terms of a dual division between ""tradition"" and ""modernity"" - a division which, Saeid Khaghani here argues, has shaped and limited the narrative applied to this architecture. Khaghani introduces and reconsiders the mosques of eighth- to fifteenth-century Iran in terms of poststructural theory and developments in historiography in order to develop a brand new dialectical framework. Using the examples of mosques such as the Friday Mosques in Isfahan and Yazd as well as the Imam mosque in Isfahan, Khaghani presents a new way of thinking about and discussing Islamic architecture, making this valuable reading for all interested in the study of the art, architecture, and material culture of the Islamic world.
